

RS-W Well Water Whole House Treatment System

NO SCALE + IRONSORB

Complete Removal of Iron, Manganese and Sulphur AND NoScale Salt Free Water Conditioner

Tired of stains and smells?

We are too! That is why AquaCera® developed a complete system designed to treat the most annoying and troublesome water problems in homes today.

Iron is one of the most common elements found in nature, and most ground waters contain measurable amounts that will stain bathtubs, toilets, sinks, driveways and even the sides of your home if not filtered out properly. Hydrogen Sulfide creates horrific rotten egg like odors that make it difficult turning your tap on.

Due to the varying nature of wells, we have developed a system that utilizes air directly into the Ironsorb filter to allow our systems to perform day in/day out whilst you enjoy high quality water throughout your home.

The use of chemicals or oxidizers such as air, chlorine, or hydrogen peroxide may be required to provide optimal treatment for your home.

- Save energy
- Save water
- Save money

No Chemicals
 No Salt
 Low Maintenance
 Green and Friendly Technology

We utilize Vortech™ distribution in all iron filter systems

Our latest machine for iron, sulphur and manganese creates an air pocket in the tank, oxidizing the contaminants in your well water and filtering them out before you see it. Our NoScale conditioner then provides you with a salt-free, scale removal and prevention system to protect your investment for years to come.

RS-W systems utilize a 3 button solid state electronics, fully automatic back-washable system designed to backwash or regenerate only when necessary for cleaning the filtration media, giving you, our customer years of trouble-free performance. RS-W systems incorporate our **IronSorb** media and **NoScale** Conditioners providing great tasting, clean and clear water that you can rely on.

Systems available to suit every home or business, including commercial and industrial applications.

All RS-W systems include by-pass valves. IronSorb system capabilities for iron, sulphur and manganese vary by size and type. Please contact your AquaCera® dealer or distributor to discuss which system is right for you.

Model Number	Tank Size(Vortech®)BW filter	Tank Size NoScale conditioner	Pipe Size	Service Flow	Floor Space	Est. Shipping Weight
RS-W-N	10" x 54"	8" x 44"	1"	5 GPM	24" x 24" x 61"	130 lbs
